Assignment 4: Gather and Display Data

- Create a console app that surveys multiple users and displays their answers.
  - The programs should surveys users one at a time
  - The program can ask any class appropriate question
    - favorite colour, music, food, donut, subject
  - You may want to limit options in your program to around 3 as we do not have a ton of classmates
  - After each users uses your software it should display the "current results" before prompting the subsequent user.
  - You may want to consider a "final" display of data after user requested program termination.

Example:

Hello,

What is your favorite western hockey team? (Calgary/Vancouver/Edmonton)

Calgary

Results thus far:

Calgary   ************

Vancouver **

Edmonton ***

Type NEW for a new user or EXIT to terminate survey
